EDUCATION

University of Houston

Bachelor of Science in Computer Science, Minor in Mathematics

Cumulative GPA: 3.20

Awards: Academic Excellence Scholarship, Dean's List

Houston, TX

Aug. 2023 – December 2027

PROJECTS

NBA Playoff Prediction Model | *Python, Pandas, scikit-learn, nba_api*

April 2026

- Developed a machine learning model using 10 seasons of NBA game data to predict game outcomes based on offensive rating, defensive rating, pace, and rest days
- Processed and analyzed 10,000+ game records using Pandas and nba_api to prepare team statistics for model training.
- Trained a logistic regression model using scikit-learn and evaluated its performance on unseen season data
- Created visualizations using Matplotlib to compare team statistics and analyze factors that contributed to game predictions.

Movie Database Web Application | *JavaScript, Node.js, Express.js, MongoDB, HTML/CSS*

Jan 2026

- Developed a full-stack movie website that allows users to search for movies and view movie information using the TMDB API.
- Built a REST API with Node.js and Express.js that allows users to create, view, edit, and delete movie reviews.
- Integrated MongoDB Atlas to store and manage user reviews and movie data.
- Created a dynamic frontend using JavaScript and HTML/CSS to display movie results and user reviews.

Delivery Route Planner | *Python, Flask, React, PostgreSQL, Maps API*

July 2026

- Developed a full-stack delivery application that calculates efficient routes for drivers handling 20+ delivery locations.
- Built a REST API with Flask to create, update, and track deliveries through pending, in-progress, and completed stages.
- Integrated PostgreSQL to store and manage 100+ delivery records, including customer locations, delivery status, and route information.
- Created an interactive frontend using React and a Maps API to display delivery locations, optimized routes, and estimated travel distance.

EXPERIENCE

Code Coogs Competition Director

January 2026 – Present

University of Houston

- Organized and hosted weekly coding competitions for 30+ participants, coordinating technical challenges and event logistics
- Lead the development of a 5-hour AI/ML hackathon with 2 competition tracks, including data science and machine learning challenges

Filipino Student Association Sports Coordinator

Sep. 2024 – May 2026

University of Houston

- Coordinated weekly practices, logistics, and tournament preparation for a team of 24+ students competing against 8+ Texas universities
- Led the team to a 1st-place finish at the statewide Goodphil Tournament through effective team coordination and preparation

TECHNICAL SKILLS

Languages: C++, C#, Python, JavaScript, SQL, HTML/CSS, R, MATLAB

Frameworks/Technologies: React, Flask, Express.js, Node.js, Pandas, scikit-learn, Matplotlib, nba_api

Developer Tools: Git, GitHub, VS Code, RStudio, Unity, MongoDB Compass

Databases: MongoDB, PostgreSQL
